

CLEARVET™

TOTAL SYSTEM ACCOUNTABILITY

The ClearVet™ DR is a direct digital radiography system designed to meet the needs of all small animal veterinary professionals. With the ClearVet™ DR, you can convert to digital with complete peace of mind knowing that your system is backed by in-house ClearVet™ hardware and software engineers. You can now say goodbye to film, chemicals, and re-takes.

Utilizing our ClearTouch™ Anatomical Programming, you can now get crystal clear diagnostic images in seconds. After images are pre-viewed at the table for correct positioning and accuracy, you get to unlock the full potential of our self-developed Blade™ acquisition software. Rich and powerful tools, such as calibrated measurements, adjustments to contrast and brightness, and comparing images from multiple patients are at the fingertips of the user and easy to use. Veterinarians can now discover the true meaning of intuitive and user-friendly software.
